

Dear Mr. King,

I'm sure you're used to receiving rave reviews on your books. But I can't keep myself from writing yet another one.

I have roughly a hundred books on numerology in my personal library. Some of them are good and some of them are great and none of them are second-rate since I don't tolerate mediocrity. But the KBN1 is a totally different level. Before I ordered it I actually wondered how much new I could learn about numerology after reading so many books on the subject. Well, let me tell you, I literally got a headache each time I finished reading a new chapter – I learnt so much from KBN1 I felt totally mind blown.

It's been over two weeks now since I got it and I've been reading and studying it chapter by chapter every day and it's been giving me insight upon insight into the hidden life of numbers. The KBN1 has opened a totally new dimension to my understanding of numerology as a system and as a language of God.

The book itself is God sent! It is the most concept-dense, original and profound book on numerology I've read. It should be a must read for any serious and self-respecting numerologist. Numerologists who haven't read KBN1 are bullshitting.

I honestly thought I knew a lot about numerology but after reading the KBN1 I have to admit all my knowledge was nothing but a pile of puzzle pieces without an idea of what the final picture should look like. The book has given me a direction on how to put it all together. I'm going to continue studying the KBN1 until I have it in my blood.

The concept that's become for me the biggest game changer as well as revelation is that of challenge numbers hidden in binaries. It helped me find answers to questions that only astrology could answer before! So I'm absolutely fascinated by this new knowledge.

Warm regards, God bless, you're the best Teacher I've had!

Erika
