

Parenting Wisdom for the 21st Century

FOREWORD

Dr. Victoria Ford, J.D.

This book is a must for any parent and for all parents to be. It is a necessity before you name your child, and if you have named your child, then to fully understand them. It is vital to raise our children not just from our perspective but from the soul's journey destiny each of them have.

Understanding numbers is a gift that Pythagoras gave us many years ago. It is a much simpler and scientific way to raise our children than just by “hoping” we will get it right. We spend far more time, money and energy doing it the untrained way.

As a mother of two children, one birth and one by an easy birth (adoption), I realize after reading this profoundly enriching parenting wisdom, that I could have made life so much easier for my birth son.

Now that I have read *Parenting Wisdom for the 21st Century*, I can share the information with my daughter so she will know how to name and raise her children when it is her time.

The key to understanding King's numerology method is that it does help to understand yourself, your children and even your marriage. I highly recommend that you know how to name your children, how to help the name work better for you and your husband, as well as any other family members.

It is vital to read this book now before you name your children. If you already have children, then it is just important to understand them. With understanding comes love, respect, ease of life and simply a great family bonding.

Our children have their own destiny, and in our world children and their parents simply do not get along as well as they could. As a family law attorney and a spiritual soul advisor, I see how families are hurting because they do not really “know” each other.

I had a session with Richard King several years ago to help me understand my daughter. It has brought ease and great understanding, as well as a greatly enhanced loving relationship. I only wish I had been able to counsel with Richard King's numerology method with my birth son. Life would be so different.

I honor and respect Richard King's work not just for parenting but for couples and families to truly raise the consciousness of this world. It starts with each family and each person.

I am excited to be able to read and apply the numerology methods to my life and to share with my family so their lives can improve and be their best.

Thank you, Richard King, for sharing your wisdom in this state-of-the-art parenting book. Beginning numerology does not handle it. It takes a completely educated professional to totally bring the subject of numerology all together.

Richard Andrew King should be called Dr. King. His books are of the magnitude that will be read with reverence for generations to come. I am honored to call him friend, and I am blessed to have his wisdom to help live my life.
